

Applied AI & Robotics Portfolio

Academic Journey & Technical Capstones

Cuong Dang

Applied AI and Robotics | Houston City College

<https://github.com/binxixi23>

www.linkedin.com/in/cuong-dang-bb42a0385

Academic Growth & Core Toolkit

- **Journey:** Foundational ML → Advanced Computer Vision → Enterprise AI Deployments
- **Environments:** Python, Google Colab, Jupyter, Git, Windows Command Line
- **Frameworks:** NumPy, Pandas, Scikit-Learn, OpenCV, TensorFlow, Keras, PyTorch

Core Course Capstones

- **Machine Learning:** Telco Customer Churn EDA Project
- **Computer Vision:** SentinelClean Intelligent Background Noise Removal Pipeline
- **AI Applications:** Real-Time Financial Fraud Anomaly Processing and Shielding Engine

Machine Learning: Telco Customer Churn EDA Project

Exploratory Data Analysis,
Predictive Modeling,
Insights

Computer Vision: SentinelCleaner Intelligent Background Noise Removal Pipeline

AI-Powered Background
Blur, Subject Focus, Noise
Reduction

AI Applications: Real-Time Financial Fraud Anomaly Processing and Shielding Engine

Real-Time Transaction
Analysis, Anomaly Detection,
Immediate Shielding

Developed AI Capabilities

- **Data Pipelines:** Profiling distributions, cleaning messy spaces, feature engineering
- **Vision & Modeling:** Convolutional Neural Networks, YOLO object detection, matrix pixel transformations
- **Analytical Evaluation:** Confusion matrices, IoU scoring, precision-recall optimization, ethical bias mitigation

Horizons & Professional Contact

- **Reflection:** Mastered end-to-end data pipelines, complex model troubleshooting, and deployment strategies
- **Future Goals:** Scaling deep learning frameworks, autonomous robotics integration, edge AI deployments
- **Links:**
